

ASC achieves ISO 9001:2000 Recertification

Ottawa, Ontario, (May 12, 2009) – Advanced Software Concepts Inc. (ASC), provider of tailored industry-specific Contract Lifecycle Management (CLM) solutions is proud to announce that it has recently achieved recertification to the ISO 9001:2000 Standard.

Originally certified in 2003, ASC continues to successfully maintain its Quality Management System (QMS) in compliance with ISO standards. The audit, conducted by BSI, one of the world's largest certification bodies, was performed over a two day period and consisted of a re-assessment of the existing certificate to ensure that all elements of the scope of registration and the entire requirements of the standard are effectively addressed by the organization's quality management system. ASC's Quality Management System provides the framework for quality planning, quality assurance, quality control and improvement.

ASC prides itself by consistently offering value added CLM solutions that are produced efficiently and always delivered on time. Adhering to the Quality Management Standards also guarantees we establish a continued cycle of improvements and assists in ensuring our solutions provide for complete customer satisfaction.

"While ASC has established itself as a supplier of high quality CLM solutions, the ISO recertification demonstrates our continued commitment to maintain our quality and customer satisfaction values." Said Shawn King, President and CEO of ASC.

ASC Quality Policy:

Advanced Software Concepts is committed to developing, deploying and supporting high-quality software solutions that consistently meet and exceed customer expectations, and to ensuring that all aspects of its business conform to the quality management system.

About Advanced Software Concepts Inc.

Advanced Software Concepts (ASC) is a tailored Contract Lifecycle Management (CLM) solutions company focused on the Communications, Financial Services and Energy and Utility industries and on those organizations with similar business processes to these industries. ASC offers ASC Contracts™, a robust, scalable and highly extensible CLM software platform designed especially to support the CLM needs of particular industry segments. Combining ASC Contracts™ with market specific expertise and an iterative development approach, ASC deploys tailored, customer-specific solutions for the secure creation, approval, storage, and monitoring of legally binding agreements.
