

SAVVIS selects ASC Contracts™ for Automated Contract Lifecycle Solution

Ottawa, Ontario, (February, 2008). — Advanced Software Concepts Inc. (ASC), provider of scalable industry-specific Contract Lifecycle Management (CLM) solutions, announced today that SAVVIS Inc., a global leader in IT infrastructure services for business and government applications, has selected ASC Contracts™ as their enterprise contract management solution (CMS). Initial deployment for their enterprise Sales organizations, including support for USA, EMEA and ASIA contracts, will occur in April 2008.

After a rigorous evaluation of industry-specific contract management solutions, SAVVIS selected ASC Contracts, a web based Software as a Service (SaaS) CLM application, to deliver a centralized, on-line repository of contract information and integration with existing and future SAVVIS systems. ASC's overall selection was due to the flexibility of ASC Contracts, a unique implementation of barcode technology which automatically recognizes and stores contracts, and ASC's very strong domain expertise in customer specific SaaS contract lifecycle management solutions for the Communications sector.

The SAVVIS tailored CMS system will automate workflow using role-based approvals & notifications, store all documents electronically in a centralized SAVVIS hosted repository, provide on-line audit and reporting capability, generate standard and redline contracts for USA, EMEA and ASIA, and automatically recognize and store barcode generated contracts. SAVVIS' key benefits include higher employee productivity, greater control of contracts and processes, and increased operational efficiencies.

Using secure web access, Sales personnel will generate uniquely barcoded contracts online in minutes. The ASC Contracts flexible workflow engine allows for automatic and concurrent notification and routing of SAVVIS agreements for business unit approvals worldwide. The ASC technology ensures contract negotiations are automatically captured for real time online access across the organization.

"Advanced Software Concepts' flexible and comprehensive contract lifecycle management solution is specifically tailored to fit SAVVIS' business model and streamline the negotiation and execution of contracts with our customers," said John Knoblich, VP Operational Support & Quality Management (OSQM). By providing greater control of our contracts and procedures for current and future contract management processes, without compromising our business processes, ASC Contracts delivers increased operational efficiencies and expedites revenue opportunities for SAVVIS".

"We are very pleased to be the successful CLM solutions vendor for SAVVIS' CMS needs. Our objective is to ensure that ASC Contracts allows SAVVIS to streamline and automate 'their' contract generation and management process. Simplified contracting processes allows SAVVIS to improve productivity, realize revenues earlier and allows their sales resources to spend more time selling and less time doing administrative work," said Shawn King, President and CEO of ASC.

The platform's advanced query and reporting tools permit sales, product, finance, offer development and legal departments to quickly analyze current contract data, assess sales cycles, and forecast trends from a current, complete, and centralized repository of contractual information. The CLM platform also provides organizations with the means to ensure compliance with contract terms and reduce the costs associated with processing and handling contracts.

ASC offers contract and vendor management services, and financial assurance solutions to service providers. ASC provides carrier tailored solutions in the areas of Wholesale and Commercial (Retail) *Contract Management and Vendor Management*. Carriers are able to purchase the platform outright, with full technical support available, or on an outsourced, term basis SaaS hosted On-Demand or On-Premise.

About Advanced Software Concepts Inc.

ASC is a leading provider of tailored, industry-specific Contract Lifecycle Management (CLM) solutions to automate and simplify business processes for the secure creation, approval, storage, and monitoring of legally binding agreements. ASC satisfies the unique and complex contract management requirements of its customers by focusing on industry-specific CLM business processes and providing tailored solutions that offer the same lower cost and reduced risk benefits as “shrink wrapped” software.
