

Sympatico/MSN selects ASC's Contract Management Solution

Ottawa, Ontario, (January 18, 2007). — Advanced Software Concepts Inc. (ASC), provider of tailored industry-specific Contract Lifecycle Management (CLM) solutions, announced today that Sympatico/MSN, a leading residential internet service provider and supplier of the Sympatico.MSN.ca portal, has selected ASCContracts™ as their contract management solution.

Sympatico/MSN selected ASC Contracts, a web based CLM application, to deliver a centralized, web based Contract Management System (CMS). The selection of ASC was due to the flexibility of ASC Contracts and ASC's very strong domain expertise in customer specific contract lifecycle management solutions in the Communications sector.

The Sympatico/MSN tailored CMS will automate all aspects of Sympatico's contract lifecycle from approval, and capture through to expiry, renewal, performance and milestone management and store all documents electronically in a centralized ASC hosted repository. Key benefits for Sympatico/MSN include increased operational efficiencies, higher employee productivity and greater control of contracts and processes.

"We are very pleased to be the successful CLM solutions vendor for Sympatico/MSN's contract management needs. Our objective is to ensure that ASC Contracts allows Sympatico/MSN to streamline and automate 'their' contract management process. Simplified contracting processes allows Sympatico/MSN to improve productivity and manage their spend better" said Shawn King, President and CEO of ASC.

The platform's advanced query and reporting tools permit sales, product, finance, offer development and the legal departments to quickly analyze current contract data, assess sales cycles, and forecast trends from a current, complete, and centralized repository of contractual information. The CLM platform also provides organizations with the means to ensure compliance with contract terms and reduce the costs associated with processing and handling contracts.

About Advanced Software Concepts Inc.

ASC is a leading provider of tailored, industry-specific Contract Lifecycle Management (CLM) solutions to automate and simplify business processes for the secure creation, approval, storage, and monitoring of legally binding agreements. ASC satisfies the unique and complex contract management requirements of its customers by focusing on industry-specific CLM business processes and providing tailored solutions that offer the same lower cost and reduced risk benefits as "shrink wrapped" software. For more information about ASC, visit the ASC website: www.ascontracts.com.
